

I'm Sue Todd and I've been with Property Club for about 16 and a half years with my husband.

How did you get started with the [Property Club](#)?

My husband found it at a property expo in Sydney when I was actually looking for property. I could see that what real estate agents were offering me, was really no support and no help. When I found the club, my husband and I were extremely excited because we found what we were looking as far as support, help, information, knowledge, being with like-minded people.

What would you say about the benefits and help you receive from the Property Club?

Well I've been a [property mentor](#) for 16 years and there is no one else on this planet Earth that offers the same services, benefits, the generosity and the help and support anywhere else in the world.

How long have you known [Kevin Young](#) for?

I met Kevin about 6 months after being in the club when I came up to do your property run, to have a look at one of my properties that I had purchased.

Are there any memorable moments that you've shared with Kevin Young?

Just being a really good friend and a genuine person that always is there to help the battler and that's why I've come in to be a property mentor, to show other people that they are working to becoming poorer if they don't start to take some responsibility. Of course the younger you start, the more time you've got for those properties to increase in value. I have a passion to help people not to be retiring under pensions.

What would you say to someone looking for more information on the Property Club?

If somebody approaches me, I usually just tell them, "You know what I do? The difference of what I came from as being a nurse, and what my superannuation was," just to try and open their eyes up to think about their future rather than being sort of complacent and waiting until it's too late.

Any final words?

Just that the property Club is one of the best things I have ever found other than my husband. The support and the help it's just fantastic. The people that we've met, like-minded people, who just want to generally get on with their lives and to have something better in their retirement after working all their life.
